Meeting Report

Summary of last OUC meeting on 27th January 2022

- A brief explanation of the previous Open User Community meeting, as well as the link to the meeting minutes, is provided:
 - Meeting minutes: https://github.com/OP-TED/ESPD-EDM/blob/wgm-reports/ESPD_Minutes_OUC_Meetings_20220127.pdf

ESPD-EDM Open User Community Reports

- The ESPD-EDM Open User Community Reports webpage (<https://docs.ted.europa.eu/espd-ouc/index.html>), that provides information regarding OUC meetings and ESPD Annual Seminars is presented.
- All presentations and meeting minutes and reports will be uploaded from now on to the ESPD-EDM Open User Community Reports webpage.
- Past OUC meetings and ESPD Annual Seminars documentation is already available on the webpage.
- The layout of the webpage is still under revision and may be updated in the near future.

ESPD v3.0.1

- ESPD v3.0.1 is presented and is available at: <https://github.com/OP-TED/ESPD-EDM/releases/tag/v3.0.1>.
- ESPD v3.0.1 is a patch release which includes editorial changes, small bug fixes and clarifications:
 - Reorganisation of the GitHub repository. Editorial changes consisting of:
 - Reorganising the distribution package folders. Navigation has been improved and labels of the folders are clearer. Additional information on the content of the different folders is available in the [release notes](#).
 - Updating the ESPD-EDM conceptual model.
 - Handbook migration to [Ted Developer Docs](#), which provides access to information regarding both the current and previous releases, to the ESPD-EDM Open User Community Reports and to the ESPD-EDM conceptual model.
 - Update cardinalities in the online documentation. Small bug fixes consisting of:
 - Updating cardinalities according to the online documentation review feedback in coordination with the data model specification.
 - Updating code lists to the latest EU Vocabularies version and enabling in TestBed v3.0.1 both for the Request and the Response.
 - Update of cardinalities in the xml example files. Small bug fix consisting in updating the xml examples according to the online documentation update.

New GitHub issues

- Recently received issues are commented (detailed information is available in the GitHub):
 - Issue [#320](#): The issue reports that there are 3 "Question Group UUIDs" that appear to be duplicate. NTTDATA comments that two of them are correct and the third one will be corrected in ESPD v3.1.0.
 - Issue [#321](#): The issue presents nine questions regarding the lot management elements and the related documentation. Answers and clarifications have been provided for each one of the questions and the issue has been closed.
- Two more issues have been received this week and are currently being reviewed.

Next meetings

- March 31st, 10.00 – 11.30. It has been agreed that the session will be a workshop dedicated to discussing in detail those topics that require further analysis regarding the UUID. A summary of the proposal, based on the slides presented by INTERPROC in the last OUC meeting (January 27th), as well

as a list of topics to be discussed in the workshop, will be distributed beforehand.

- April 28th, 10.00 – 11.30.
- June 16th, 10.00 – 11.30.

AOB:

- The OP comments that, if there are no objections from any of the participants, the list of participants will be included in the meeting minutes as usual. No objections are received during the meeting.
- The OP comments that next ESPD release (v3.1.0) has not been scheduled yet, but it will not be available before June.
- Norway is working in the implementation of ESPD v3.0.0 and would like to share their experience with other countries in the same situation. Many other countries are interested in ESPD v3.0.0 and some of them will probably start implementing it soon.
