Meeting Minutes

Summary of the last meeting 29th October 2020

- A brief explanation of the previous Open User Community (OUC) Meeting and the GitHub issues discussed.
- A link to the meeting minutes is provided.

V3.0.0 Release Process

- An overview of the key steps of the release process is given to the audience. Key message in understanding what artefacts are going to be generated as part of the implementation and its current status.
- Everis points out that a Business Handbook will be provided to explain the Exchange Data Model in a summarised manner.
- Stakeholders will find the new documentation on GitHub organised in a new branch. This is the same repository as in the previous releases.
- MC clarifies that the ESPD will no longer have a basic model. Usage of the extended version will allow future compatibility with eForms.

Code List change proposal for v3.0.0

- Detailed information regarding each Code List is provided, with the current status and the agreed update for version 3.0.0.
- MC explains that the decisions taken on each code lists are aimed at obtaining better alignment with eForms.
- NM points out that, in order to gather feedback on the decisions presented from stakeholders, there will be a dedicated issue on GitHub per Code List. As an example that could be a participant to request usage of a Code List that is now proposed to be removed.
- NM explains that up to last version, everything was in English. However in version 3.0.0 the OP aims to make other languages available in EU Vocabularies and in ESDP.
- Discussion arises regarding changes around CriteriaTaxonomy. Up to V.2.1.1 a very logical code was proposed to each criteria, however, MC explains that the goal is to set them up as domain neutral for the next release as the vision is close relate ESPD to eCertis. The solution will be to use a link from ESPD to EU Vocabularies which will be continuously maintained.
- Discussion arises regarding the Code List for profession. It is proposed to use ISCO (International Standard Classification of Occupation). An issue will be created in order to analyse its feasibility and convenience in detail (is it translated, is it comprehensive, etc.) by different participants, and this topic will be discussed again in the next meeting.
- NM points out that v.3.0.0 will be available in March. It is agreed that in March (version 3.0.0) Code Lists will be built in the ESPD, and later on in June a newer version will be available with links to EU vocabularies.

Next Meetings

- The next OUC is scheduled on the 3rd of March 2021 at 14:00.
